viii) Providing 14nos. 2 ton split air conditioners to the filling and product storage area.

ix) Providing adequate monitoring system inclusive of closed circuit TV system at the existing office and

x) Providing adequate computerised counting system for upto date monitoring of total production.

xi) Providing can conveyor system to sales counters from the product storage area.

xii) Providing adequate steam water supply and sewerage system for sanitation equipment and packaging area.

xiii) Providing stainless steel Track storage system for product storage.

xiv) Providing one number floor washing machine.

xv) Providing can collectors.

xvi) Aqua Jet/ Steam vacuum cleaners.

xvii) S.S. Pipe lines.

(d) Mechanisation of the distribution system.

(1) Supply of the filled and labeled aravana cans to the eight distribution centers of which one will be for bulk sale through 4 channel belt conveyor with counting sensors and master computer and closed circuit television system to monitor distribution activities and a time lapse video recording system for ensuring full security of operations, providing 7 number of distribution counters for unit sales of Aravana cans and one no.of counter for bulk sales, providing multiple conveyor system for feeding of Aravana cans to each distribution counters inclusive of individual computerised counting facility.

2) Providing 3 nos. of split air conditioners to the sales counters.

3) Providing steel counding and granite slabs to the counters.

4) Providing separate cash and product chutes to the 8 nos.of counters.

5) Providing closed circuit TV system for monitoring distribution.

6) Providing computerised "Lan and Wan" connectivity from cash counting machinesand can counting sensors fitted to the conveyors.
